We are still discussing the removal of the highly contaminated sediments at the mudflat at River Mile 10.9 (Lyndhurst) with the Cooperating Parties Group. Our self-imposed time frame for these discussions lasts until mid-April. So for now, we are still working on the FFS, for issuance later this year, but things may change in April.

Alice:

Have there been any further developments with respect to the issuance of the Focused Feasibility Study?

Regards,

Steve Singer
